**Subject:** Synopsis of EPA main BDCP/DEIS points

Jared: To follow up on our CEQ meeting today and our earlier discussions, we would like to set up a time soon for our senior staffs to get together with your folks to be briefed in whatever way you want on the major observations with EPA's review of the draft BDCP plan and the draft EIS. Bob Perciasepe and Ken Koposis agreed that doing so makes sense. I also believe that the core team of federal principals would probably benefit from hearing of these main comments directly. Perhaps we can perhaps explore if there is an opportunity to set something up for next Wednesday in Sacramento when we will all be gathering -- DC and regional folks . If the day is too crowded, then I suggest that the senior staff book a time, and the principals can catch up later.

If this is acceptable to you, could you please ask your leads to get in touch with our folks in BOR, FWS and NOAA and set something up?

We also discussed somewhat separately the timing of the receipt of the EPA comments and other issues, and we can taken those details up in due course.

Many thanks.

WS
